

DIGITAL VISUAL FIELD SCREENER

"At last ... a fully featured visual field screener for PCs and laptops - great for domiciliaries"

FIELD SCREENING MADE SIMPLE

The Thomson Digital Field Screener is a fully-featured visual field screener which runs on a PC or a laptop. It is ideal for domiciliaries or as a backup in your practice. The software includes 30-2, 24-2 and 10-2 screening protocols and can be used in multiple-stimulus, single stimulus, suprathreshold and thresholding modes. At last - the visual field solution that clinicians have been waiting for.
