

# THOMSON TEST CHARTS

*“The inventors of computerised Test Charts  
continue to define the standard”*

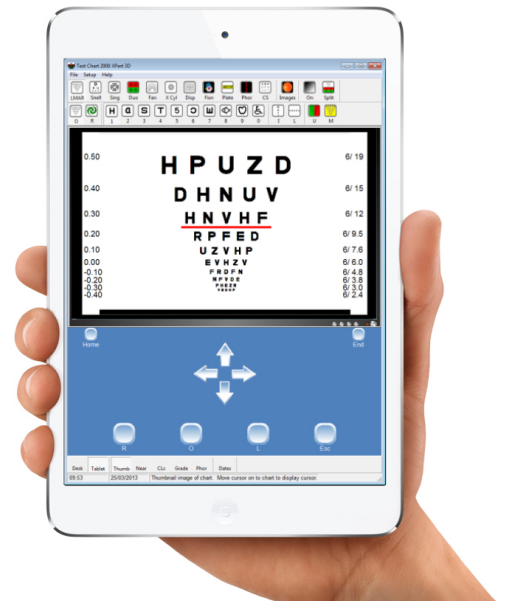

## SETTING THE STANDARD

Thomson Software Solutions developed the first computerised Test Chart in the mid-90s. Since then our charts have been installed in more than 8000 consulting rooms in the UK alone, including most of the major hospitals and University Optometry Departments.

Our Test Charts provide an unrivalled range of visual assessment tools while maintaining a simple and intuitive interface.

Don't compromise on the most important instrument in your consulting room - fit the best.
