

BV ANALYSER

“The modern way to perform Hess Screen and Field of BSV tests ... quick and accurate ”

ACCURATE BV ASSESSMENT

The BV Analyser is a professional and efficient solution for performing accurate Hess Screen and Field of Binocular Single Vision tests.

The system was developed in collaboration with orthoptists and is available as software only or as a complete solution including bespoke instrument table, 48" monitor and touch screen PC.

FEATURES

- Hess Screen provides accurate assessment of deviations in 9 or 25 directions of gaze
- Option to measure torsion in each direction of gaze
- Superimpose multiple plots to assess change over time
- Rapid assessment of Field of Binocular Single Vision
- Semi-automated or manual test protocols
- Powerful database and report generator
- Available as software only for a PC or as a complete hardware/software solution
